The Abbie, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary beriodicals. It is an elegant indiscollary of time, light and strace full librature; and a collection of pictures, the rarest specimens of artistic skill, in black and wide. Although each sheesening minister attories a fresh picasine of its triends, the real value and boardy of The Abbies will be most appreciated after it has been bound up at the close of the Year. While other publications are claim superior cheapiness, as compared with rivals of a similar class, The Abbies is a unique and original conception—alone and mapproached—about the picture of character. The Hiustrations of The Abbine have won i world-wide reputation, and in the art control f Europe it is an admitted fact that its woscurs are examples of the highest perfection of Europe if is an admitted fact that its wood cuts are examples of the highest perfection ever attained. The common presudent in taver of "steel plates," is rapidly yielding to a more educated and discriminating taste which recognizes the advantages of superior artistic quality with greater facility of production. The wood cuts of The Admie possess all the delicacy and chaborate finish of the most costly steel plate, while they alford a better rendering of the artists original.

To fully realize the wonderful work which The Admie is doing for the cause of art culture in America, it is only necessary to consider the cost to the people of any other decent representations of the produce for any other decent representations of the produce examples of the Sational Academy, and other noted American artists, The Admie will reproduce examples of the shifted fired, Thus the subscriber to The Admie storeign masters, selected with a view to the highest artistic success and greatest general interest, Thus the subscriber to The Admie will, at a trifling cost, enjoy in his own home the pleasures and refining influences of true will, at a trifling cost, enjoy in his own home than pleasures and refining influences of true will. BOOK BINDING.—We are now ready to receive orders for all kinds of work.

Every subscriber to The Addine for the year 184 will receive a pair of chromos. The original pictures were painted in oil for the publishers of The Addine, by Thomas Moran, whose great Colorado picture was purchased by Congress for ten thousand dollars. The subjects were chosen to represent "The East" and "The West." One is a view in the White Mountains, New Hampshire; the other gives Tho Cill's of Green River, Wyoming Territory. The difference in the mature of the scenes themselves is a pleasing contrast, and affords a good display of the artist's scope and coloring. The chromos are each wo ked from thirty distinct plates, and are in size (12 x 16 and appearance exact fac-similes of the originals. The presentation of a worthy example of America's greatest hand-scape painter to the subscribers of The Addine was a bold but peculiarly happy idea, and its successful realization is attested by the following testimonial, over the signature of Mr. Moran himself:

Messin, James Sutton & Co.

Gentlemen,—I am delighted with the proofs in color of your chromes. They are wonderfully successful representations by mechanical process of the original paintings:

(Signed.) Tillos, MORAN.

(Signed.) Tilos. MORAN.

These chromes are in every sense American. They are by an original American process, with material of American manufacture, from designs of American seenery by an American painter, and presented to subscribers to the lirst successful American Art Journal. It no better because of all this, they will certainly possess an interest no foreign production can inspire, and neither are they any line worse if by reason of peculiar facilities of production they cost the publishers only a trille, while equal in every respect to other chromos that are soid singly for doubt the subscription price of The Adiase. Persons of taste will prize these pictures for themselves—not for the price they did or did not cost, and will appreciate the enterprise that renders their distribution possible.

sible.

If any subscriber should indicate a preference for a figure subject, the publishers will send "Thoughts of Home" a new and beautiful ehromo 14 x 20 inches, representing a little Rallan exile whose speaking eyes betray the longings of his beautiful.

The Aktins will, hereafter, he obtainable only by subscription. There will be no reduced or club rate; cash for subscriptions must be sent to the publishers direct, or handed to the local canvasser, without responsibility to the publishers, except in cases where the certificate is given, bearing the fac simile signature of James sutton & Co.
